FULL NAME

PROFESSIONAL SUMMARY

Senior Full Stack Software Engineer with 5+ years of experience architecting distributed cloud applications, scalable microservices, and modern reactive frontends with Python, FastAPI, React, and AWS.

TECHNICAL SKILLS

Languages: Python, TypeScript, JavaScript, Go, SQL
Frameworks: FastAPI, React, Next.js, Node.js, Tailwind CSS
Cloud & DevOps: AWS (ECS, S3, RDS), Docker, Kubernetes, CI/CD GitHub Actions, Terraform
Databases: PostgreSQL, Redis, MongoDB, Kafka

PROFESSIONAL EXPERIENCE

Senior Full Stack Engineer — CloudScale Solutions 2022 - Present
• Architected high-throughput async microservices processing 30M requests daily with 99.99% uptime.
• Engineered real-time analytics dashboard with React, Tailwind, and WebSockets, cutting latency by 45%.
• Optimized PostgreSQL query execution and Redis caching strategies, reducing p99 latency from 240ms to 65ms.

Full Stack Developer — NextGen Media 2019 - 2022
• Developed scalable REST APIs using Python and FastAPI integrated with Stripe payment gateways.
• Streamlined deployment pipelines using Docker containers and automated GitHub Actions CI/CD workflows.
• Led frontend migration to React 18 and TypeScript, enhancing test coverage to 92%.

KEY PROJECTS

Distributed Event Processing Broker (Python, FastAPI, Redis, Kafka, Docker)
• Designed and implemented a distributed pub/sub broker handling 25k event payloads per second with guaranteed at-least-once delivery semantics.

AI-Powered Career Intelligence Platform (React, TypeScript, Tailwind CSS, FastAPI, PostgreSQL)
• Full-stack platform delivering automated ATS resume analysis, mock interview voice simulations, and dynamic multi-phase learning roadmaps.

EDUCATION

B.S. in Computer Science — University of Washington 2019

CERTIFICATIONS

• AWS Certified Solutions Architect - Associate
• Certified Kubernetes Administrator (CKA)
